▶ Medical staff widely suffering from MSD's*

MSD

First reason for sick leave

13 %

Rate of absenteeism in healthcare facilities

3400 €

Average cost per employee

Medical staff walk between **10 to 15 kms a day**, having heavy carts to handle, like nursing trolleys which may **weigh 80 kg**.

Handling a medical cart may be difficult due to bend and elevator thresholds. Medical staff makes also multiple stops due to patients' requests. This requires additional physical efforts and often leads to **improper postures**.

Handling a cart implies to lean the body forward, which may cause diseases, like lumbago, shoulder pain... The medical staff is largely suffering from musculoskeletal problems (MSD's).

*MSD's: Musculoskeletal problems

Move of heavy load implying improper work posture

Musculoskeletal problems

Sick leaves

Non productivity: cost for the facility

► EasyMoove: 100 % motorized carts

Is medical staff in your facility **exhausted by handling** the nursing, dressing or medicine distribution **carts**?

Praticima **offers a unique solution**: carts equipped with a motorized wheel. This innovation will remove push efforts done by the users. **Control of the motorization is done very easily with one hand**. Medical staff will benefit from **optimal working conditions**.

- + **100 % motorized:**
handle a 80 kg cart with one hand
- + **Excellent manoeuverability and ergonomic handle:**
less efforts, less risks of MSD's
- + **Ergonomics as an economic solution,**
return on investment by reducing the costs of sick leaves
- + **Selection of the speed and progressive acceleration**
- + **Adaptive system for irregular floors**
- + **Large autonomy of the battery:**
manual mode possible in case the battery has not been charged
- + **Easy to use and to charge the batteries**

Motorized carts available for:

- Nursing trolleys
- Dispensing trolleys
